

School of Computing RESEARCH ETHICS COMMITTEE

APPLICATION FORM FOR ETHICAL REVIEW OF A RESEARCH PROJECT INVOLVING HUMAN PARTICIPANTS WHICH IS IN THE CATEGORY OF NOTIFICATION ONLY

There are 3 generally accepted levels of ethical review for projects carried out in a University or similar setting. These are notification only, expediated and full committee.

This notification only level of review is to approve relatively low-risk research involving human participants, primarily using social science methodologies in which any personal information collected is not of a sensitive nature. The School of Computing Research Ethics Committee has been delegated responsibility by the University to approve ethics submissions from undergraduate and taught Masters projects only, which are in the category of notification only.

Examples of projects in this category include:

- Anonymous surveys in which the topic itself is not likely to elicit significant difficulties for the participants, such as: anonymous internet surveys (e.g. Survey Monkey), street questioning.
- Observation (without audio or visual recording) of public settings where privacy would not normally be expected, such as observing people on streets or at sports events.
- Research carrying no risks beyond those of everyday life (as experienced by the intended participant population), such as asking people's opinions about products or services; asking students about educational experiences; monitoring the impact of daily activities.
- Interviews with public figures, professionals or others in their professional capacity regarding their professional activities.
- Analysis of data (e.g. health records) which have had all identifying information removed by the data holder and been provided to the researcher in accordance with data protection legislation.
- Collection of biological samples which are anonymised and do not require invasive techniques (e.g. hair, nails).

If your project is using data from a public repository like Kaggle or is not generating or using any form of personal data then you do not need research ethics approval, you do not need to complete and to submit this form and your project supervisor should indicate this on the project dashboard.

If your project involves collecting or processing <u>personal data which is of a personal nature</u>, you must first complete the DCU online Data Protection training course and review the <u>"Data Protection – Key Points for DCU Researchers"</u> guidance from the Data Protection Unit to assist you in meeting your legal obligations under GDPR and associated Irish law.

Once you have completed this form (if you need to) you should save it as a PDF file, not WORD, and upload it to the your project dashboard before you start gathering data. It will then be read and assessed by two members of the committee and once two members of the committee approve your submission you will be automatically notified by email and your project can start data gathering.

There are strict deadlines for submitting this form for each class group, undergraduate and taught Masters by which your submission must be made and you will be informed of these deadlines by your course board chair or project co-ordinator. If you do not submit by these deadlines then the research ethics committee is not obliged to approve your submission and when that happens and your project is assessed and graded at the end of the year, you will be awarded 0 for that component of your project.

SECTION 2 – PROJECT DESIGN AND METHODOLOGY

Research Overview - Please respect the indicated word counts in the following sections and explain all acronyms in full text the first time they appear.

2.1 Provide a brief description of the research (max 250 words):

Please use lay language, include the scientific/theoretical background of study and a justification as to why this research project should proceed in that context

For our application, the research that we would carry out is the feedback that we would find throughout the user-testing phase of the application. This is the standard means of testing completed for applications of this nature.

The purpose of this research is that we would have a more refined version of our application that has implemented the various aspects that we received from the people that we had met in these public settings that were previously mentioned. By examining the audience of our research we may also further assess our target market.

2.2 Please state the aims and objectives of the project (max 200 words)

The project is a social-media application, primarily to be configured for mobile devices, that is focused around a central map. Users can "pin" a location on this map and then invite other users to hang out.

They can set up a proposed time and description or links of what will be happening in the area, temporary group chats for these events can be created which will be deleted after the pin is removed. You can set public events that can be seen by mutual friends or keep everything private. You can "favourite" locations that you frequently visit as well as groups of friends you normally hang out with.

At these events with your friends, you can upload photos to the pin that can be shared publicly or kept private afterwards. Users who were at the event will receive these photos, which can be posted on a timeline. This timeline could also include advertisements and events listed by bars, clubs or societies to let people know about future events.

2.3 Please confirm your methods of data collection:

Tick all relevant check boxes and provide details for each one, including any devices used to collect data, and whether the data will be anonymous, potentially identifiable or identifiable at point of collection

Method	Describe briefly
	Asking groups of people questions regarding how they made plans and if there are any ways to streamline the process. Interviews with a selection of individuals for application testing.
☐ Surveys/questionnaires	
☐ Audio/video recordings

2.8 Please confirm how the results of the research will be disseminated:		

findings or outcomes of the project

Participants will not receive specific feedback from our sessions with them. They will be informed that any information they provide is based on their personal opinions, which will help assist us in developing and refining of our application to meet the user's needs and expectations.

SECTION 3 – ETHICAL ISSUES AND RISK MANAGEMENT

3.1 Please identify all issues including ethical issues which may arise in the course of this research. What are the potential risks to participants, and how will those risks be addressed or minimised?

Potential risks can be physical, psychological, social, legal, etc. Please include details of any additional support being provided for participants during/after the study

- Privacy and data security concerns with location-based services.
- Applications event planning features, which encourage real-world interactions, could lead to various social risks if the application is misused.

3.2 Please identify the potential benefits (direct and/or indirect) to those participating in this research:

Potential benefits should outweigh the potential risks to participants

Direct Benefits:

- Networking Opportunities + First-hand exposure to our application
- Potential insight into the app development process
- Satisfaction from using the application

Indirect Benefits

- Encouraging safe social interaction
- Relieving stress and loneliness
- Improving event planning + participation

3.3 Please describe what measures/protocols you have put in place in the event that there a	ıre
any unexpected outcomes or adverse effects to participants arising from involvement in t	he
research:	

If there are any unexpected outcomes based on	individuals' opinions,	it would still be	considered
in our project as constructive feedback.			

If individuals do not want to interact with us - We will not be persistent in asking them questions.

SECTION 4 – CONFIDENTIALITY AND DATA MANAGEMENT

4.1 Considering your previous response in section 2.3 of the form on data collection, please confirm whether you are collecting or processing personal data in this research project:
,
Personal data is any information about a living person, where that person is either identified, or
could be identified from the data itself, or when it is combined with other data. This includes paper
based, electronic and biological samples data. If your data is fully and completely anonymous, it is
<u>not</u> personal data.
Yes ⊠ No □
If Yes, please confirm your compliance with the following by ticking the checkboxes:
guidance on the DCU Data Protection Unit (DPU) website and agree to protect and manage our
data in accordance with same.
project, and confirm that all DPU GDPR requirements have been met prior to submitting this
application (e.g. completion of Data Protection questionnaire, confirmation that any survey tool
being used is GDPR compliant, that required Data Processing or Sharing Agreements will be in
place, etc.)
4.2 Data access - please confirm whether access to participant data is confined to the
investigators named on this application:
Yes ⊠ No □
If No, please name who the other individuals are and why they need access. Any proposed transfer
of data (including outside of the EU) should be detailed here.
4.3 Data storage – please confirm compliance with the following:

SECTION 5 - PARTICIPANT INFORMATION AND INFORMED CONSENT PROCEDURES

In addition to completing this form you are required to attach, within the single PDF that you submit, a copy of (1) the Participation Information Sheet which you share with your participants and (2) a copy of the Informed Consent Form which your participants sign.

5.1 Please confirm that the following items have been addressed in your Participant Information Sheet which should be shared with all participants whether it involves online or in-person data gathering:

The items below should be used as headings in yourinformation sheet. Note the language used under each item must reflect the participant age group and corresponding comprehension level—if your participants have different comprehension levels (e.g. both adult and child participants) then separate sheets must be prepared for each set. Templates are available via the <u>REC Forms</u> - <u>Applications</u>. Templates and Amendments section of the Research Ethics website.

SECTION 6 - SUBMISSION CHECKLIST AND RESEARCHER DECLARATION

6.1 Please confirm all required supplementary documentation to be included in this application within Section 7:

Checklist – tick the relevant check box for each item	Yes	N/A
Participant Information Sheet/s	\boxtimes	
Informed Consent Form/s	\boxtimes	
Informed Assent Form/s	\boxtimes	
Recruitment Advertisement	\boxtimes	
Questionnaire/Survey	\boxtimes	
Interview/Focus Group Questions	\boxtimes	
Debriefing Material	\boxtimes	
Bibliography	\boxtimes	
Approval from another Research Ethics Committee	\boxtimes	
Evidence of other external approvals (e.g. Board of Management letter)	\boxtimes	
Evidence of internal approvals (e.g. BSC approval review letter)	\boxtimes	
Other – provide details here:	\boxtimes	

6.2 Signed Declaration

By submitting this form, the applicant (and supervisor) agree to the following:

The information contained herein is, to the best of my knowledge and belief, accurate. I have read the University's current research ethics guidelines, and accept responsibility for the conduct of the procedures set out in the attached application in accordance with the form guidelines, the <u>REC guidance and resources</u>, the University's <u>Conflict of Interest Policy</u>, its <u>Code of Good Research Practice</u> and any other condition laid down by the Dublin City University Research Ethics Committee. I have attempted to identify all risks related to the research that may arise in conducting this research and acknowledge my obligations and the rights of the participants.

I also acknowledge my requirement to be informed as to other duties and legal obligations applying to my research, and to comply with these duties and obligations – this includes being informed about DCU Data Protection guidelines for researchers, DCU Child Protection policy and procedures (where relevant) and DCU Insurance requirements.

I and my co-investigators and/or supporting staff have the appropriate qualifications, experience and facilities to conduct the research set out in the attached application and to deal with any emergencies and contingencies related to the research that may arise. Research will not commence until required consents and approvals are in place.

Electronic Signature(s): Supervisor: Print Name here: Sahraoui Dhelim Date: _18/10/2024 Student(s) signature(s): Michael BEIRNE-PONOMAREV ROBERT MALONEY Date: 16/10/2024

SECTION 7 – SUPPLEMENTARY DOCUMENTATION

Please attach all required documentation as confirmed by you in the previous section. The application should then be saved as one file in <u>PDF format</u> before submission via the project dashboard.

DCU Research Ethics Committee Participant Information Sheet

Introductory Statement

Our names are Michael Beirne-Ponomarev & Robert Maloney. We are currently studying Computing for Business within the School of Engineering & Computing. The research study that we are working on is titled Pinpoint – Event Planning for All.

What is this research about?

The research we are conducting is asking various groups of individuals certain questions based on how they currently plan their events along with how it may be streamlined for our application. We also plan on asking on potential feedback

Why is this research being conducted?

This research is being conducted as we would like to be able to interact with potential users on a first-hand basis. It is crucial that any of the information that we receive is taken into account, as we would like to see our application thrive within todays society. We may take into consideration additional features that are suggested along with addressing various concerns that the user may have while using PinPoint.

Why have you been invited to take part?

You have been invited to take part in our research as we feel that you fit our target market for our application (Young Adult / Marketing Representative). We feel that individuals such as yourself could find enjoyment and relief from using our application on a day-to-day basis.

In the even that there is a dependent relationship between the individual and the researcher. This will not affect your assessment, grading or management within your studies.

What will happen if you decide to take part in this research study?

If you choose to participate in our research studies, we will ask very open style questions. Such as "What do you think could be added?" or "Is there any concerns?" These questions can vary and should only take a maximum of 10 minutes.

Any answers given will be anonymous and we will not ask for any of your personal details. Remember that we are only looking for your opinions and thoughts on our application to enhance it.

DCU Research Ethics Committee Participant Information Sheet

How will your data be used?

Your data will be primarily used to refine and enhance our application. As mentioned above, the types of questions will be broad and will be based on your opinion.

In terms of how the data will be stored – It will be stored securely on our DCU GitLab repo so that it can only be accessed by us on stored within the DCU servers.

Once our project has been completed – your data will be securely deleted or overwritten as it will not be of use once the project has been finalized.

If there are any concerns regarding how your data will be used please contact Mr. Martin Ward (data.protection@dcu.ie Ph.: 7005118 / 7008257) who will handle any of the data protection concerns arising from this research.

The individual has the right to lodge a complaint concerning the use of any personal data within the *Irish Data Protection Commission*.

How will your privacy be protected (including any legal limits to confidentiality)?

All participants who are taking part will remain anonymous as mentioned above. We will not ask for any personal information to ensure that participants will remain anonymous and that they feel secure about giving their opinions.

Although there may be times when it cannot be guaranteed that it will be protected for the time that is stored. All information that has been given will not contain any personal details – e.g Participant 1 – "The App would be nicer if it contained a different font" If there are any queries from this please ask before taking part in our research.

What are the benefits of taking part in this research study?

Direct Benefits:

- Networking Opportunities + First-hand exposure to our application.
- Potential insight into the app development process.
- Satisfaction from using the application.

Indirect Benefits

- Encouraging safe social interaction.
- Relieving stress and loneliness.
- Improving event planning + participation.

What are the risks of taking part in this study?

- Privacy and data security concerns with location based services.
- Applications event planning features, which encourage real-world interactions, could lead to various social risks if the application is misused.

DCU Research Ethics Committee Participant Information Sheet

Can you change your mind at any stage and withdraw from this study?

The participation within this project is entirely voluntary and you have the right to withdraw your consent at any time prior to the finalization of the project. If you do choose to withdraw please inform us and your involvement with our project will end immediately.

If there is any data that is taken and secured, it will be overwritten or securely deleted as mentioned above. However, this can only be done before your data has been anonymized or the findings have been already published.

How will you find out what happens with this project?

If the conclusion of this project, you may have the opportunity to learn about the various results and outcomes. There may be a potential summary for the projects findings will be shared with all participants.

If there are any specific questions that may be asked feel free to get in touch with us for a follow-up session on the progress of the project. We would be more than happy to assist and catch you up on how the project has been taking shape.

If there any queries or questions for further information about the project or the questioning process please contact us.

If participants have concerns about this study and wish to contact an independent person, please contact: The Secretary, Dublin City University Research Ethics Committee, c/o Research and Innovation Support, Dublin City University, Dublin 9. Tel 01-7008000, e-mail rec@dcu.ie

DUBLIN CITY UNIVERSITY Plain Language Statement

Introduction to the Research Study

Our names are Michael Beirne-Ponomarev & Robert Maloney. We are currently studying Computing for Business within the School of Engineering & Computing. The research study that we are working on is titled Pinpoint – Event Planning for All. Our supervisor is Sahraoui Dhelim and he can be contacted at sahraoui.dhelim@dcu.ie

Privacy Notice

An appropriate Privacy Notice is the means by which data subjects are informed about the use of their data. If personal data is being collected and processed, please refer to the University's <u>Data Protection Unit</u> website for advice and include the following information in the PLS:

- The identity of the Data Controller (or in some cases the Joint Data Controllers) plus the details of any Data Processor (where applicable) should be clearly stated on the PLS. The Data Controller will nearly always be DCU (where the researcher is a DCU researcher). The PLS should also state the name of the research project and the identity of the particular School / Unit of DCU from which it originates. A Data Processor may hold or process personal data but does not exercise responsibility for or control over the personal data, for example, a transcription service, or a software or cloud hosting company.
- The identity of the DCU Data Protection Officer Mr. Martin Ward (<u>data.protection@dcu.ie</u> Ph.: 7005118 / 7008257)
- The purpose of the data processing i.e. the reasons why the data is being requested and the purpose to which it will be applied.
- The reason(s) for which the data will be processed or held.
- The categories or types of personal data to be processed.
- The details of any third parties (i.e. data processors) with whom the data will be shared or transferred, and the reasons for sharing.
- The details of any external (i.e. non-DCU) parties with whom the data will be shared or transferred, and the reasons for sharing.
- Where relevant, details of any intention to transfer the data to other countries, especially if outside of the EEA (European Economic Area), and the legal basis invoked for such transfers.
- The data's retention period or the criteria used to determine retention periods.
- The right of the individual to lodge a complaint with the <u>Irish Data Protection Commission</u>.
- Information on the rights of the data subject Individuals' have the right to access their own personal data and PLS should inform them how to do this and who to contact either within the research team, or alternatively by contacting the Data Protection Unit.
- Information on their rights to withdraw consent (if invoked) and who to contact to withdraw consent.
- If it is intended that the data be used for future studies, you must specify the general parameters of the future further research uses to which the participant's personal data may be used.
- In cases where personal data will later be anonymized (e.g. for statistical or aggregated data), it is best practice to describe this, so that the participant is fully informed.

Statement as to whether or not the research data is to be destroyed after a minimum period Our data will be destroyed by 13th of June 2025

Details of what participant involvement in the Research Study will require

Our research study will involve interviews and questionnaire

Any benefits (direct or indirect) to participants from involvement in the Research Study

Direct Benefits:

- Networking Opportunities + First-hand exposure to our application.
- Potential insight into the app development process.
- Satisfaction from using the application.

Indirect Benefits

- Encouraging safe social interaction.
- Relieving stress and loneliness.
- Improving event planning + participation.

DUBLIN CITY UNIVERSITY Plain Language Statement

Statement that involvement in the Research Study is voluntary

Your involvement in this research study is entirely voluntary. You are free to choose whether or not to participate, and you may withdraw from the study at any point without any penalty or need for justification. If you decide to withdraw, your participation in the project will end at that time.

If there are any concerns regarding how your data will be used please contact Mr. Martin Ward (data.protection@dcu.ie Ph.: 7005118 / 7008257) who will handle any of the data protection concerns arising from this research.
